1.0	railroad station have been compl. project is 2.8 million eastmarks envisaged: a. Reconstruction of the road b estation to provide space for b. Lengthening of the station tr	eted. The estim . The following ridge on the so three tracks u racks as far as	ated cost for the construction work is uth side of the nderneath it.	
1.0	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station tracks a total length	eted. The estim . The following ridge on the so three tracks u tacks as far as h of 750 meters	ated cost for the construction work is uth side of the nderneath it.	
lo	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station tracks a total length	eted. The estim . The following ridge on the so three tracks u cacks as far as h of 750 meters ng track. between the rat	ated cost for the construction work is uth side of the nderneath it. this bridge to give	25X1 25X1
2.	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station tracking a total length tracks a total length of a new shunting of the station of a new shunting construction of a new tracking works, 2 km north of the station of the s	eted. The estim . The following ridge on the so three tracks u cacks as far as h of 750 meters ng track. between the rail fon.1	ated cost for the construction work is uth side of the nderneath it. this bridge to give a linear station and cemester that the construction and cemester the construction and cemester the construction and cemester that the construction and cemester the construction and cemester the construction and cemester that the construction are constructed by the construction and cemester that the construction are constructed by the construction and cemester that the construction are constructed by the construction work is constructed by the construction work in the construction work is constructed by the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the cons	25X1 25X1
	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station tracking a total length tracks a total length tracks a total length works, 2 km north of the station of the s	eted. The estim . The following ridge on the so three tracks u racks as far as h of 750 meters ng track. between the rail ion.1 rations were recepted two new to	ated cost for the construction work is uth side of the nderneath it. this bridge to give a linear station and cemester that the construction and cemester the construction and cemester the construction and cemester that the construction and cemester the construction and cemester the construction and cemester that the construction are constructed by the construction and cemester that the construction are constructed by the construction and cemester that the construction are constructed by the construction work is constructed by the construction work in the construction work is constructed by the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the construction work in the construction work is constructed by the cons	25X1 25X1
2.	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station traceight tracks a total length of the construction of a new shuntiful. c. Construction of a new shuntiful. Construction of a new track works, 2 km north of the station of the statio	eted. The estim . The following ridge on the so three tracks u cacks as far as h of 750 meters ng track. between the rail ion. rations were received two new to the sound on 1953. the Bauunion Brilroads on 1 Marian	ated cost for the construction work is uth side of the nderneath it. this bridge to give classes and station and ceme sumed between Calau en railroad line. 2 racks were to be randenburg will be rech 1953. It was	25X1 25X1 ent
2.	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station traceight tracks a total length of the construction of a new shuntiful. c. Construction of a new track works, 2 km north of the station of	eted. The estim . The following ridge on the so three tracks u cacks as far as h of 750 meters ng track. between the rail ion. rations were recorded two new to the solution in 1953. the Bauunion Baune existing Baune existing Baune	ated cost for the construction work is uth side of the nderneath it. this bridge to give classes and station and ceme are railroad line. 2 racks were to be randenburg will be reh 1953. It was union firms to	25X1 25X1 ent
23.	vailroad station have been completed is 2.8 million eastmarks envisaged: a. Reconstruction of the road be station to provide space for b. Lengthening of the station traceight tracks a total length of the station of a new shuntiful. c. Construction of a new shuntiful. d. Construction of a new track works, 2 km north of the station	eted. The estim . The following ridge on the so three tracks u cacks as far as h of 750 meters ng track. between the rail ion. rations were recorded two new to the solution in 1953. the Bauunion Baune existing Baune existing Baune	ated cost for the construction work is uth side of the nderneath it. this bridge to give classes and station and ceme are railroad line. 2 racks were to be randenburg will be reh 1953. It was union firms to	25X1 25X1 ent
